Mehta, P. H., Mor, S., Yap, A. J., & Prasad, S. (2015). Dual-hormone changes are related to bargaining performance. *Psychological Science*, 26, 866–876. (Original DOI: 10.1177/0956797615572905)

An error was introduced into this article during copyediting. The fourth sentence of the abstract should read as follows:

Conflict between financial and social goals was related to the financially costly dual-hormone profile (testosterone increase and cortisol increase), whereas the absence of such conflict was related to the financially adaptive dual-hormone profile (testosterone increase and cortisol decrease).
